

efa+

healthy skin starts within

The DMK concept of revising the skin: REMOVE, REBUILD, PROTECT and MAINTAIN, has won worldwide recognition and endorsement by the medical profession. Through its unique combination of state-of-the-art botanical science and innovative technology, DMK has created one of the most advanced skin care systems on the planet.

To add to this advance skin care program, DMK also offer *efa+*, a unique blend of essential fatty acids.

#### What makes *efa+* so good?

DMK *efa+* contains Evening Primrose Oil, Seabuckthorn Oil and Vitamin E. Evening Primrose Oil is considered to be the best source of Omega Fatty Acids while Vitamin E performs its functions as an antioxidant.

Seabuckthorn Oil has also been incorporated due to its high concentration of vitamins, minerals and trace elements. Seabuckthorn Oil contains over 100 nutrients and bioactive substances.

#### The DMK difference

With so many fish oil products on the market it can be difficult to identify a high quality product. DMK is a step ahead of many of its competitors in the way of harvesting and processing the *efa+* ingredients.

DMK utilise specially selected and produced plants which are harvested when their beneficial elements are at their highest. This process is designed to keep the plant's properties active.

By using an advanced extraction method, DMK ensure the least structural damage is caused to the extracted oil without adding trace toxins. This means you get all the bioactive properties at their highest potency.

*\* Consult your doctor before using DMK efa+ if you are pregnant or nursing. Only use as directed. Vitamin supplements should not replace a balanced diet. If symptoms persist please see your doctor.*

Recommended Retail Price: \$62.50 (120 tablets)
