

hydrophilic crème

intense hydration

Originally formulated as a water retaining facial crème for extremely dry, dehydrated skin, *hydrophilic crème* has been revised and re-formulated to suite most skin types. Containing vitamins A and D, as well as rich fractionated botanical oils, *hydrophilic crème* helps to seal in maximum moisture.

With the ability to retain ten times its weight in water, *hydrophilic crème* aims to boost hydration in even the driest skins as well as those whose moisture levels simply need a boost.

hydrophilic crème also acts as an excellent barrier protection crème for those who work outdoors and require extra protection and superior hydration.

After cleansing the skin, apply your DMK serums and oils before lightly massaging in a thin layer of crème with the DMK *herb & mineral mist*.

Recommended Retail Price: \$107.50 (60mL)
