

## *retosin*

restore the balance with *retosin*

*retosin* aims to balance the skin by exfoliating and allowing fluids to flow freely.

*retosin* uses a botanical base to dissolve dry and dead skin cells. The regenerative properties of retinol (vitamin A) are known to address P-acne bacteria and regulate the flow of oil and cellular proliferation. Unlike other vitamin A products, *retosin* does not penetrate the blood stream.

Key ingredient:

- Retinyl palmitate – A keratolytic antioxidant with exfoliating properties. It aims to neutralise free radicals which attack the skin's primary structure. It can also extend the life of the cell and regulate cell proliferation.

This product is very versatile and is recommended for both prematurely aged and acne prone skins. Designed to gently remove dead, redundant skin cells - whilst strengthening the skin - *retosin* aims to revise the appearance of fine lines, dryness and sun-damage.

This product is used in conjunction with any DMK skin revision program and prior to DMK's Pro-Alpha Six-layer Peel.

RRP: \$104.00
