

revise-A

exfoliate and regulate

revise-A provides effective exfoliation while aiming to regulate cell proliferation.

This advanced formulation contains the latest technology and breakthrough ingredients to combat and fight against the ageing process.

revise-A contains essential ingredients which provide your skin with necessary Lactic Acid. Vitamin A derivatives such as Retinyl Palmitate and Retinol regulate the skin's abnormal cell proliferation. This directly influences the skin's growth factors, fibroblast cells and collagen production.

Effective exfoliation and cell growth regulators will keep the skin supple, fresh and smooth.

Revise-A is designed to:

- Revise the appearance of wrinkles and fine lines
- Smooth and firm the skin
- Protect against free radical damage
- Nourish and moisturise
- Refine and brighten the skin's appearance.

Recommended Retail Price: \$98.00 (30mL)
